\_\_\_\_\_

What steps are taken to ensure that the out of state patient is seen by the Doctor signing this profile?

\_\_\_\_\_

Upon request Hallandale Compounding Pharmacy may ask for blood work or diagnosis for any patient on Human Growth Hormone. Does this pose a problem for the clinic?

\_\_\_\_\_

Human Growth Hormone (HGH) is the active ingredient in a number of human prescription drugs approved for marketing in the U.S. under new drug applications (NDAs). FDA-approved HGH can be legally prescribed for a limited number of conditions including:

- \* hormonal deficiency that causes short stature in children;
- \* long-term treatment of growth failure due to lack of exogenous GH secretion;
- \* adult growth deficiency
- \* long-term treatment of short stature associated with Turner Syndrome;
- \* adult short bowel syndrome;
- \* adult deficiency due to rare pituitary tumors or their treatment; and
- \* muscle-wasting disease associated with HIV/AIDS.

When prescribing HGH does the Doctor signing this profile prescribe it according to what its legal indications are (stated above)?
